

SPECIALTY TIRE

REINFORCE

MULTI-PURPOSE

MAXWAY, WEMAX IT

MPT B-I

All-terrain, all-position radial for special service such as Emergency Response and Tactical Wheeled vehicles

Features:

- Self-cleaning, open shoulder tread design features offset elements to help enhance traction and floatation capabilities on varied terrains including snow, sand, mud and highway.
- Radial casing design optimized to operate at lower pressures to offer exceptional mobility and enhanced enveloping capabilities to resist impacts.
- Full-width steel belts and elastic protector ply help provide added casing protection against most off-road hazards.

MPT B-III

All-terrain, all-position radial for special service such as Emergency Response and Tactical Wheeled vehicles

Features:

- Self-cleaning, open shoulder tread design features offset elements to help enhance traction and floatation capabilities on varied terrains including snow, sand, mud and highway.
- Radial casing design optimized to operate at lower pressures to offer exceptional mobility and enhanced enveloping capabilities to resist impacts.
- Full-width steel belts and elastic protector ply help provide added casing protection against most off-road hazards.
- M+S design for extremely muddy and snow situation

MULTI-PURPOSE

BT169

All-terrain, all-position radial for special service such as Emergency Response and Tactical Wheeled vehicles

Features:

- · Reinforced Shoulder design to enhance loading capability and reduce uneven wear;
- Stone-reject design to reduce stone puncture;
- · Reinforced central bottom tread to enhance tire stability and puncture resistance;
 - Deep tread depth and cut resistant compound to achieve high wear rate to maximize tire life; Tread 1+4 ply & Sidewall 1 ply design to offer enhanced Single 5000kgs/Dual 4625kgs loading capacity;
- Self-cleaning, open shoulder tread design to enhance traction and floatation capabilities on varied terrains including snow, sand, mud and highway.
- Radial casing design optimized to operate at lower pressures to offer exceptional mobility and enhanced enveloping capabilities to resist impacts.
- Full-width steel belts and elastic protector ply help provide added casing protection against most off-road hazards.
